Botify

A Media Art Promotion App

Developed by

Djanic Julia Zuzana

Student of

FH Campus Vienna

Personal Identification Number

1810475099

Course of Studies and Year

Computer Science and Digital Communications 21VZ

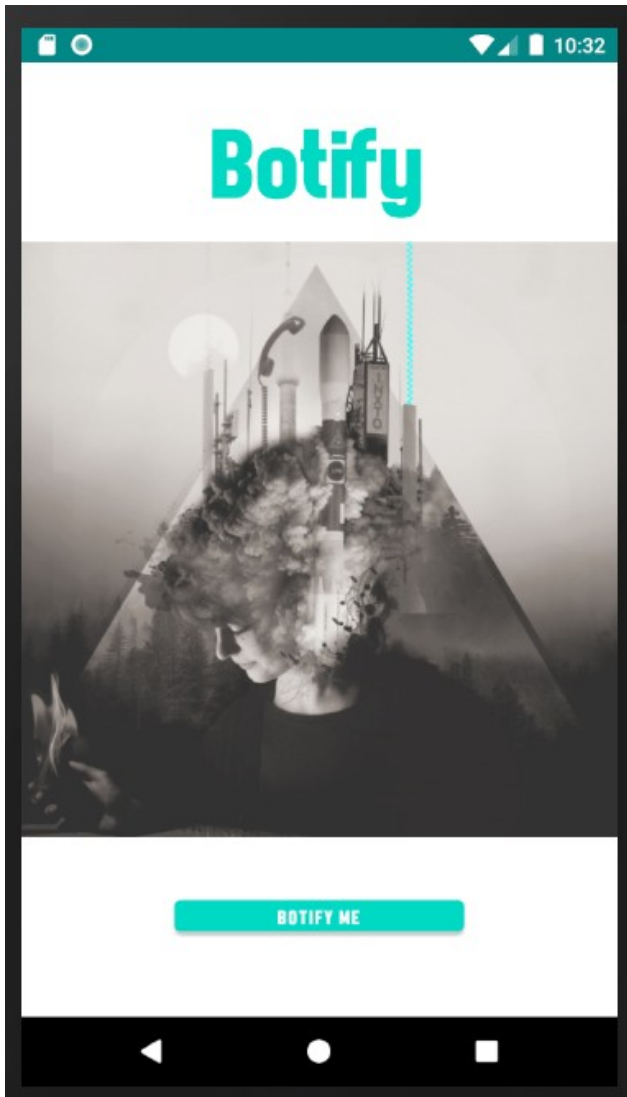

Term

WS20/21

Subject

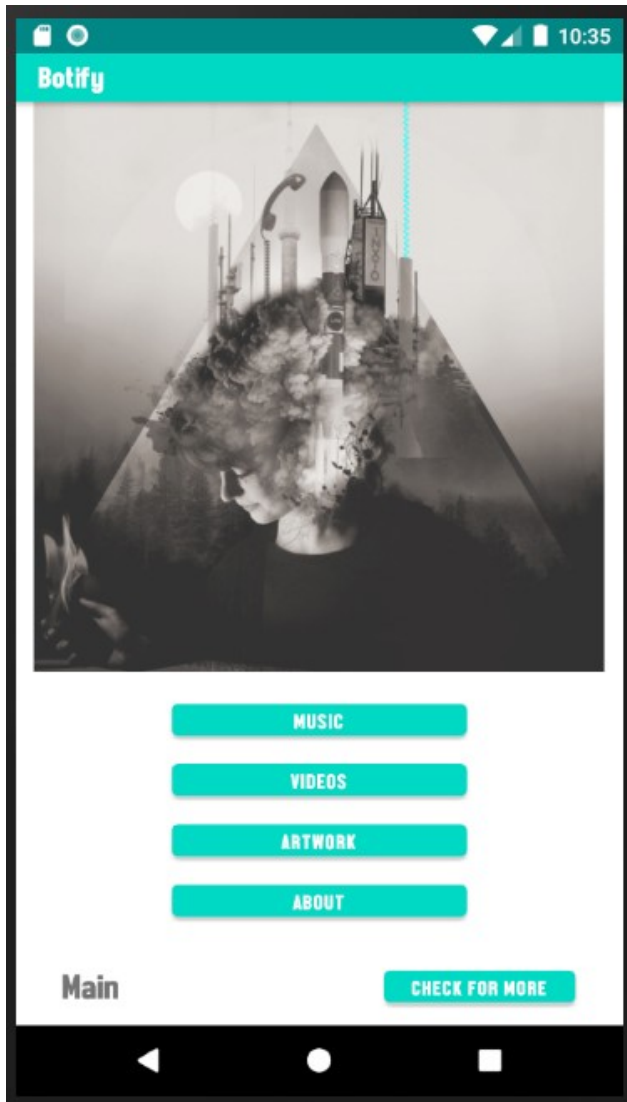

Elective Subject Project 2

Starting The App

- Upon entry of the app, the user sees the start screen.
- It shows the name of the app and an image made by the artist.
- Clicking the "Botify Me" button redirects to the main menu.

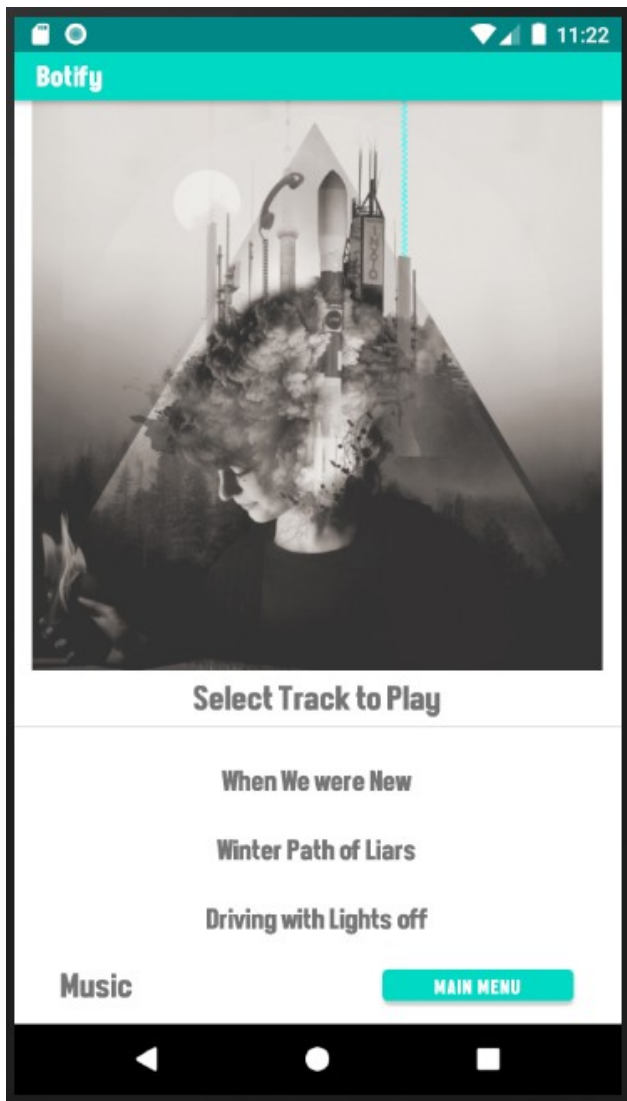

The Main Menu

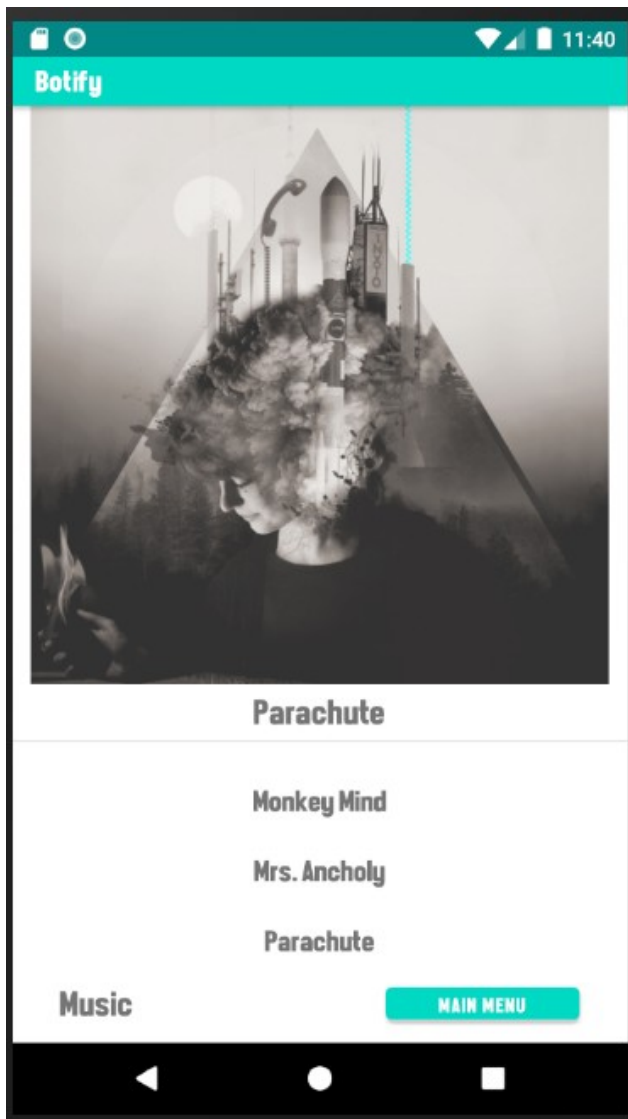

- The main menu shows 4 buttons which can be selected:
 - Music,
 - Videos,
 - Artwork, and
 - About.
- Upon clicking one of the buttons, the user gets redirected to the according submenu.

(The "Check for Update" button is not yet functional, so clicking it has no result)

The Music Sub Menu

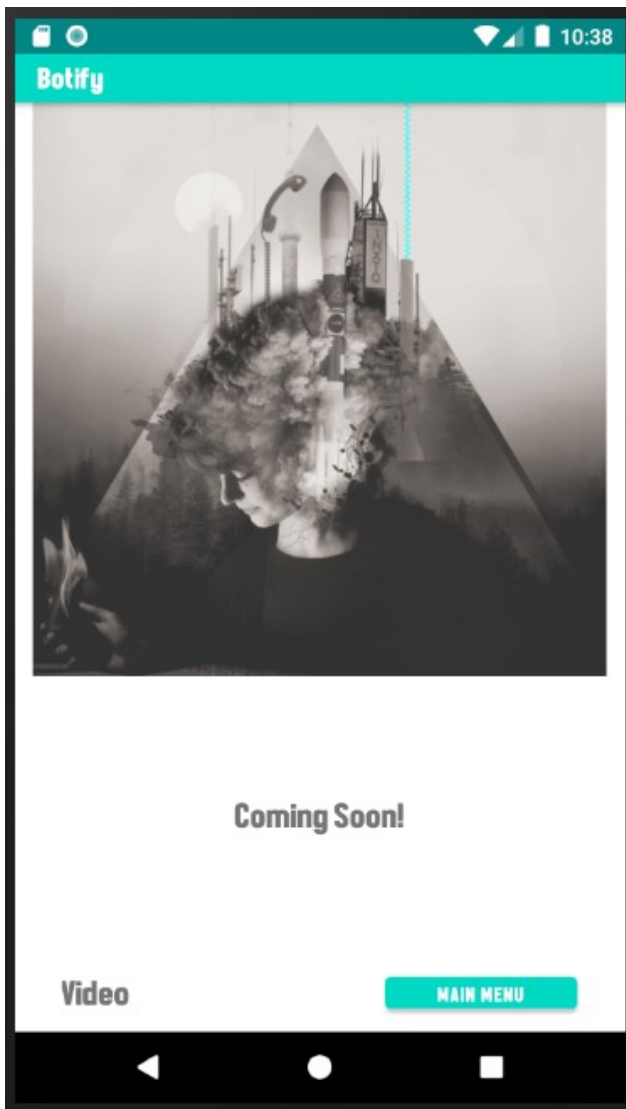

- The Music submenu shows a vertically scrollable list of music tracks.
- Upon tapping on the name of a track, the name of the track shows up in the text view which says "Select Track to Play" and the audio will be played. If there was already one running, it will be stopped. The name of the selected track will appear instead, and its audio will start.
- The audio will stop when the user navigates away of this view.
- The "Main Menu" button redirects to the main menu.

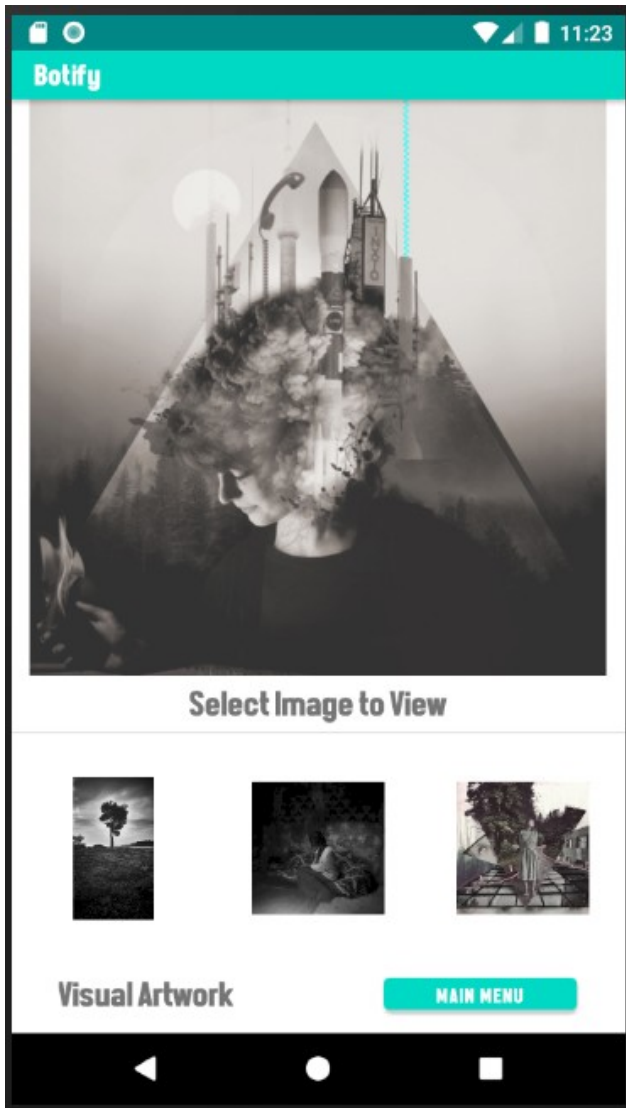

(display of current track)

The Video Sub Menu

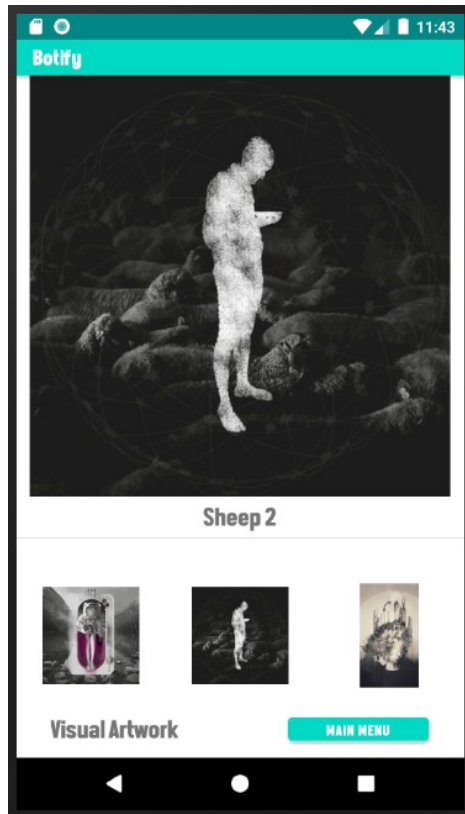

- The video submenu acts as a placeholder until further implementation.
- The "Main Menu" button redirects to the main menu.

The Artwork Sub Menu

- The artwork submenu shows a vertically scrollable selection of images, shown as thumbnail-size previews.
- Upon selection of an image, the image will be displayed in the window above the list. The name of the image will be displayed where "Select Image to View" can be read. Tapping another image will change the image and its name accordingly.
- Tapping on the image in the window, the image will be displayed in full. Tapping on the image in single view navigates back to the submenu.
- The "Main Menu" button redirects to the main menu.

(image with title upon choosing it)

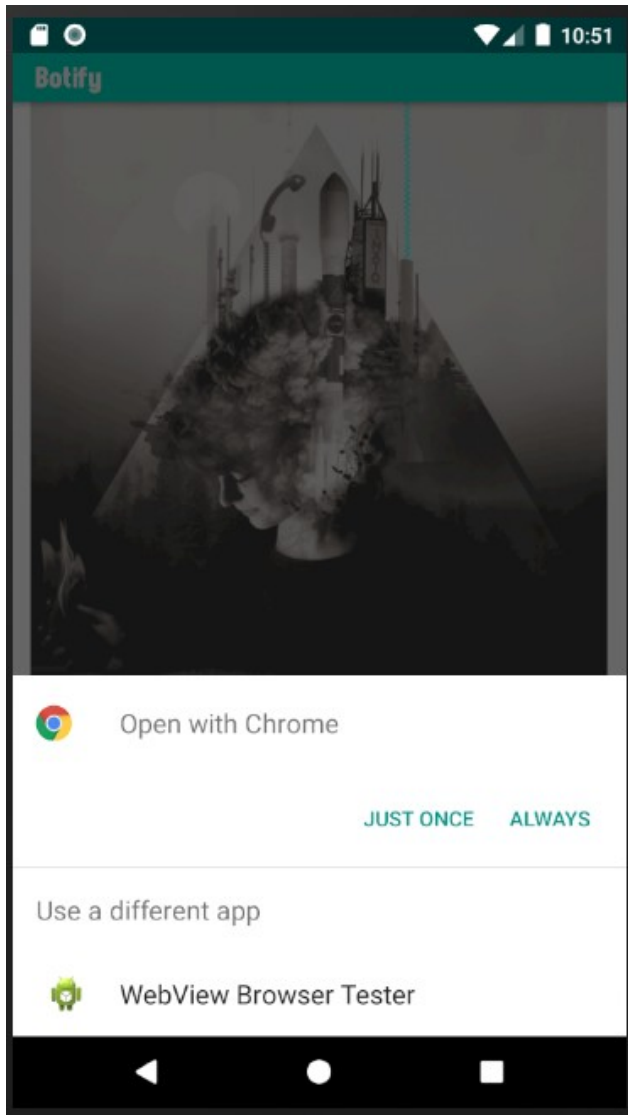

(full display example)

The About Sub Menu

- The about submenu shows a short description about the work of the artist. The text is vertically scrollable, in case the device on which the app is used has not enough screen size to display all contents as intended.
- Upon clicking on the weblink, the app opens the default browser of the underlying system (or a dialogue for choosing a browser) to give external access the artist's web site.
- The "Main Menu" button redirects to the main menu.

(underlying OS asking for choosing a browser)
